Objective

Cybersecurity professional with hands-on SOC experience in **log monitoring, incident detection, and response** using SIEM tools including **Splunk**, and **IBM Qradar**. Skilled in **threat hunting, correlation rule creation, log analysis**, and applying the **MITRE ATT&CK** framework for adversary behavior analysis. Passionate about strengthening enterprise security by monitoring, detecting, and mitigating cyber threats.

Education

Galgotias University, Greater Noida – Bachelor of Computer Science June 2025

- CGPA: 7.1

- **Coursework:** Network Security, Cyber Forensics, Operating Systems

B P S Inter College, Akalpur, Rabupura, Greater Noida– Secondary Education (12th) 81.6 % April 2021

Technical Skills

- **SIEM & Security Monitoring:** IBM QRadar, Wazuh, MISP, MITRE ATT&CK
- **Threat Detection & Response:** Log monitoring, correlation rules, offense investigation, incident escalation, SOC playbooks
- **Offensive Security:** Burp Suite, Metasploit, Nmap, OWASP Top 10, John the Ripper, Hashcat, ZAP Proxy, Nessus
- **Security Tools:** Shodan, Maltego, Wireshark, TheHarvester, Autopsy, FTK Imager, Sleuth Kit
- **Programming & Scripting:** Python (Basic), Bash, MySQL (Basic)
- **OS & Platforms:** Linux, Windows, VMware, VirtualBox, Network Protocols, SSH, SSL/TLS, Cloud (AWS EC2, S3)

Experience

Cyber Security Analyst Intern, NetForChoice Dec 2024 – June 2025

- Performed log monitoring and threat detection using Splunk and Wazuh, analyzing security events and alerts.
- Monitored logs and alerts in Wazuh/Splunk SIEM, detecting suspicious activities such as repeated failed logins, privilege escalation attempts, and unusual outbound traffic.
- Investigated incidents, mapped findings to MITRE ATT&CK, and recommended remediation.

Projects

Network Traffic Analysis Tool

- Developed a tool that analyzes network traffic in real-time, highlighting potential security breaches.
- Integrated detailed interactive dashboards for administrators to monitor traffic flow.
- Implemented automated alerts to detect unusual traffic patterns, enhancing network defense mechanisms.

Certifications and Extra Activity

Certified Ethical Hacker (CEH Practical) – EC-Council April 2025.

Certified in hands-on ethical hacking techniques, covering penetration testing, network security, and real-world attack simulations.

Certified Network Security Professional (CNSP) – OpSec Group

Credential demonstrating advanced skills in defensive security, SOC operations, and network monitoring.

Ethical Hacker Badge – CISCO

Awarded for completing Cisco's cybersecurity challenges and demonstrating expertise in ethical hacking concepts.

Top 4% – TryHackMe Global Cybersecurity Ranking

Ranked among the top 4% of users globally for completing cybersecurity labs, CTFs, and advanced security challenges.
